

Towards Sustainable ICT

Commentary notes

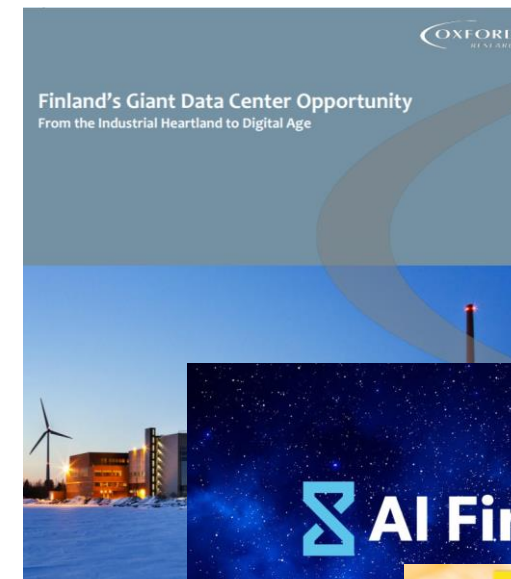

Jussi Nissilä

About the presenter

- Jussi Nissilä, CEO of Finnish Information Processing Association TIVIA
- D.Sc. degree from University of Turku (Information Systems Science)
- Career in policymaking, consulting and international collaboration

TIVIA in brief

- Nationwide independent society for ICT professionals and students
- A community of 10 000 individuals and 300 organisations, users and producers of ICT
- 30 member associations:
 - 17 regional associations
 - 9 professional theme associations
 - 4 student and youth associations

Digitalisation, responsibility and sustainability

- ICT a general purpose technology, from niche to mainstream use in 2000s
- All industries and sectors will be digitalised
- The society changes as well: professions, social relationships, politics..
- The impact of ICT is multifaceted, positive and negative
